EDUCATION

- Ph.D. in Anthropology, University of Florida, with a concentration in Forensic and Biological Anthropology Gainesville FL. Dissertation: *Intrinsic Variability and Scaling of the Modern Human Foot: Sexual Dimorphism, Ecogeographical Patterning, and Biomechanical Perspectives* (Dr. Michael Warren, Supervisory committee chair).
- 2002 **M.S.** in Human Biology, **University of Indianapolis**, Indianapolis IN. *A Taphonomic Analysis of Ohio Hopewellian Modified Animal Jaws from Tremper Mound* (Dr. Stephen P. Nawrocki, Advisor).
- 1998 **B.S.** in Human Biology (Interdisciplinary major Anthropology and Biology) **State University of New York at Albany**, Albany, NY.

WORK EXPERIENCE

2014 to Supervisory Forensic Anthropologist, (GS-14 step 04* special rate table #700H*; Series: 0190) Defense present POW/MIA Accounting Agency Central Identification Laboratory (DPAA-CIL).

In addition to responsibilities listed below, as a supervisory forensic anthropologist my duties include additional laboratory administrative and management responsibilities that contribute to maintaining a safe, productive, and creative work environment and developing a staff and atmosphere that fosters a culture of high ethical standards and scientific integrity. As functional areas I supervise several large commingled human remains (CHR) resolution projects, the Scientific Analysis Disinterment Initiative (determining the ability to identify individuals buried as "Unknowns" in various cemeteries worldwide based on historical and anthropological records), and a antemortem/postmortem database and reconciliation project ("Solvability/Resolvability project"). I am the liaison for the Laboratory for Agency Strategic Planning (a 6 year strategic plan) as well as the operational plan (a more focused 2-year planning body).

- 2005 to Forensic Anthropologist, (GS-13 step 07* special rate table #700H *; Series: 0190) Joint Prisoner of War/Missing
 2014 in Action Accounting Command-Central Identification Laboratory (JPAC-CIL).

 Responsibilities include:
 - Recovery Leader for the forensic archeological recoveries and investigations of unaccounted-for service members from past conflicts. Duties include supervising and conducting all aspects of archaeological recoveries (worldwide; typically at remote locations), directing military (teams of ~10-15 individuals) and local work forces toward the recovery of all pertinent information at a site leading to case resolution. Over 40 deployments to date (~35-55 days each deployment),worldwide including North Korea, Vietnam, Laos, Cambodia, Germany, South Korea, and Papua New Guinea. Often deployments require negotiation and coordination at various levels within foreign governmental agencies and with local populous (e.g., village elders).
 - Conducting skeletal analysis using advanced forensic anthropological techniques to aid in the identification of missing U.S. military personal. Conducting analyses of military artifacts and material evidence recovered from sites. Writing and peer review of laboratory scientific reports and case file coordination. Conducting validation studies of advanced anthropological methods.

Emanovsky

- Auditing the CIL laboratory management system as part of a robust quality assurance program in association with ASCLD/LAB accreditation. Communicating findings to top management (e.g., Laboratory and Scientific Directors).
- Providing consultations (on forensic fieldwork, skeletal analysis, radiographic identifications) for various medicolegal offices, including the Honolulu Medical Examiner's office and the Federal Bureau of Investigation.
- Providing laboratory based instruction as well as formal lectures for Fellows enrolled in the Forensic Science Academy.
- Public affairs functions-providing tours of the laboratory/field operations to distinguished visitors (high-ranking governmental officials (domestic and foreign) and family members of the missing; giving interviews for media events and documentaries (journalists are sometimes embedded with recovery teams, other times my interaction has been via press conferences, or one-on-one interviews).
- Representing the U.S. and the DoD at international mass disasters, providing assistance and expertise in current forensic identification protocols and policies for dealing with mass casualties and human identification.
 - 2005-Member of International Disaster Victim Identification (DVI) team at the 2005-South East Asian Tsunami, Thailand. Provided expertise for identification procedures, conducted initial processing and logistical management of casualties, liaised with various stakeholders, military and civilian, during this large multinational response- for this work I received a Humanitarian Service Award.
 - 2006-World Wildlife Federation MI-17 aircraft crash, Nepal. I was the forensic anthropologist sent by the DoD at the request of the DoS to aid in the identification of 24 individuals from multiple countries (including the U.S.) who were involved in a fatal helicopter crash. I worked with Nepalese and U.S embassy officials to effect the identification and repatriation of the deceased, met with and debriefed some family members of the deceased, all in coordination with an ad hoc DVI team (two members from Finland and two from the United States, including myself).
 - O 2014-Organized and moderated a symposium between JPAC-CIL and the International Committee for the Red Cross (ICRC)-Assistance Division (forensic advisors). The symposium highlighted human identification efforts in the context of the ethical and moral obligations societies have to ensure their missing are recovered and identified post mass disasters, war, and other conflicts. Further emphasis was placed on the obligations forensic practitioners and policy makers have to keep families as well as the population at large informed of the progress.
- 2002 to Forensic Anthropologist (ORISE Fellow), Joint POW/MIA Accounting Command-Central Identification 2005 <u>Laboratory (JPAC-CIL)</u>(formerly known as U.S. Army CILHI). Responsibilities are same as above.
- 2004 <u>Graduate Assistant, C.A. Pound Human Identification Laboratory (CAPHIL) University of Florida.</u>
 Assist with recovery, processing, reconstruction and analysis (identification and trauma analysis) of forensic human remains cases for various medico-legal offices.
- 2001 to Advanced Crew Member, P-III Associates, Inc. Salt Lake City UT.
- 2002 Responsibilities included archeological survey, recording archeological and historical properties, mapping, photography, as well as other data collection and research. (Full-time, 6 months).
- 2001 <u>Field Director</u>, Advanced Forensic Archeology Field School. Mercyhurst Archeological Institute, Mercyhurst College. Erie, PA. Responsibilities included instruction of a 2-week field school in forensic archeological field methods with a concentration on interpreting complex taphonomic scenarios. Topics included: search strategies, excavation techniques, mapping procedures, photography, and other death-scene, and mass disaster evidence collection protocols. (June 4 –15)
- 2000 Physicians for Human Rights Cyprus Project 2000.

Participated in continuing analysis of skeletal material obtained during the 1999 PHR mission in Cyprus (see below). Emphasis was placed on rectifying commingling issues, as well as revisitation of skeletal inventories for an internal quality control check. This mission also involved a forensic recovery in Pyrgos Village. I was the team leader of the 3-day excavation of remains from a disturbed clandestine grave context..

Emanovsky

1999 Physicians for Human Rights Cyprus Project 1999.

Participated in humanitarian mission with <u>Physicians for Human Rights</u> in Cyprus. This mission involved 6 weeks of fieldwork (excavation of mass graves) and 10 weeks of laboratory analysis (biological profile, trauma interpretation, etc.). An additional aspect of this mission was the training of an international team of physicians and forensic professionals (e.g. Forensic pathologists) in the basic methods and theory of Forensic Anthropology and international human rights work. Responsibilities included: excavation, analysis, assistance with training component, photography, as well as cataloging and processing of skeletal material and associated evidence. (May-August).

- 1998 to Laboratory Assistant, Archeology and Forensics Laboratory, University of Indianapolis.
- Assist with recovery, processing, reconstruction and analysis of various prehistoric, historic, and forensic human remains cases. In this capacity I assisted various medical legal and law enforcement offices with forensic anthropological tests and services. Analysis of Ohio Hopewellian modified trophy jaws from Tremper Mound. Creation of a comparative histological bone and tooth specimen collection. (Part-time)
- 1997 to Internship, New York State Museum, Albany, NY.
- 1998 Under the supervision of Dr. Brenda Baker. Assisted with the photographic documentation, reconstruction, inventory, and analysis of human skeletal remains as part of a comprehensive Native American Graves Protection Repatriation Act inventory; metric and non-metric analyses of historic remains from New York State Police, and various New York State Coroner's offices. (Part-time, 6 months).

TEACHING EXPERIENCE

- 2013 <u>Guest Lecturer</u>, Department of Forensic Sciences, Chaminade University. *Introduction to Forensic Anthropology* (Three lectures: ancestry and discriminant function analysis, stature determination, radiographs and identification)
- 2009 <u>Guest Lecturer</u>, Department of Anthropology, University of Hawaii West Oahu. *Introduction to Forensic Investigations*. (Two lectures: Introduction to Osteology and Case Studies in the Detection of Clandestine Burials).
- 2007 <u>Lecturer</u>, Department of Anthropology, University of Hawaii West Oahu. Team taught (1/3 of semester) *Ecological Anthropology*.
- 1999 <u>Teaching Assistant,</u> Department of Biology, University of Indianapolis. Indianapolis, IN. Assisted with a graduate laboratory section of *Human Gross Anatomy*. Responsibilities included assisting with dissections, and preparation of laboratory practicals. (Part-time).
- 1998 to <u>Teaching Assistant</u>, Department of Biology, University of Indianapolis. Indianapolis, IN. Assisted with laboratory and classroom activities. Courses include: *Introduction to Biological Sciences Laboratory, General Biology Laboratory, Anatomy and Physiology Laboratory*, and *Human Evolution*. (Part-time).

SEMINARS AND WORKSHOPS (Instructor)

- JPAC/ICRC Symposium on Humanitarian Forensics and Human Identification: The symposium discussed perspectives on the current best practices employed toward the identification of the missing, and highlighted human identification efforts in the context of the ethical and moral obligations societies have to ensure their missing are recovered and identified post mass disasters, war, and other conflicts. JBPHH, HI. February 24-28. (Organizer and Moderator)
- 2002 *1st Annual Forensic Anthropology Demonstration Short Course in Spain:* Documentation and Recovery of Evidence at the Outdoor, Fire, and Terrorism Crime Scene. Taramundi, Spain. April 9-12. (Instructor)
- 2000 Indiana Coroners Association Annual Meeting. Merrilville, IN. (Guest Lecturer)
- 2001 Laboratory Methods in the Documentation, Analysis, and Interpretation of Human Remains from Forensic Contexts. Short Course presented by Mercyhurst Archeological Institute. May 29-June 2. (Assistant Instructor)
- Death Scene Archaeology: Field Methods in the Location, Recovery, and Interpretation of Human Remains from Outdoor Contexts. 10th Annual Short Course presented by Mercyhurst Archeological Institute. May 20-26.

(Assistant Instructor)

- 2000 *Crime Scene Archaeology*---A field training program in forensic archaeology and the recovery of human remains. Sponsored by the Federal Bureau of Investigation, St Louis Division, Evidence Response Team. October 2-6. (Lecturer as well as assisted with instruction of field exercises and demonstrations.)
- 2000 Death Scene Archaeology: Field Methods in the Location, Recovery, and Interpretation of Human Remains from Outdoor Contexts. 9th Annual Short Course presented by Mercyhurst Archeological Institute. May 22-27. (Assisted with instruction of field exercises.)

SEMINARS AND WORKSHOPS (Participant)

- 2014 27th Annual Colonel Henry F. Williams Homicide Seminar. New York State Police- the application of forensic science to death investigations, Albany NY.
- 2014 *Bias in Forensics*. An American Academy of Forensic Sciences Workshop. An American Academy of Forensic Sciences Workshop. Seattle, WA.
- 2013 A National Forensic Sciences Enterprise and transparency in Forensic Science: Legal and Practitioner Views on Our Path Forward. An American Academy of Forensic Sciences Workshop. Washington, DC.
- What Did You Just Step In?! Use of Forensic Soil Examinations to Find Out. An American Academy of Forensic Sciences Workshop. Atlanta, GA.
- 2010 The Forensic Investigation of Human Remains from Armed Conflicts and Catastrophes. An American Academy of Forensic Sciences Workshop. Seattle, WA.
- 2010 ASCLD/LAB-International Assessor/Auditor Training. A 40 hour course detailing how to assess forensic laboratories against ISO/IEC 17025:2005 and 2006 ASCLD/LAB-International supplemental requirements. Waikiki, HI.
- 2009 ISO/IEC 17025:2005: Section 5.4.6 Estimation of Uncertainty-Is Anyone Certain What This Means? An American Academy of Forensic Sciences Workshop. Denver, CO.
- 2007 Forensic Science: Moving Forward through the Changing Tides. An American Academy of Forensic Sciences Workshop. San Antonio, TX.
- 2007 Bayesian Hierarchical Models. A 3-day course on Bayesian hierarchical models and using WinBUGS. Imperial College, London.

OTHER QUALIFICATIONS/AFFILIATIONS

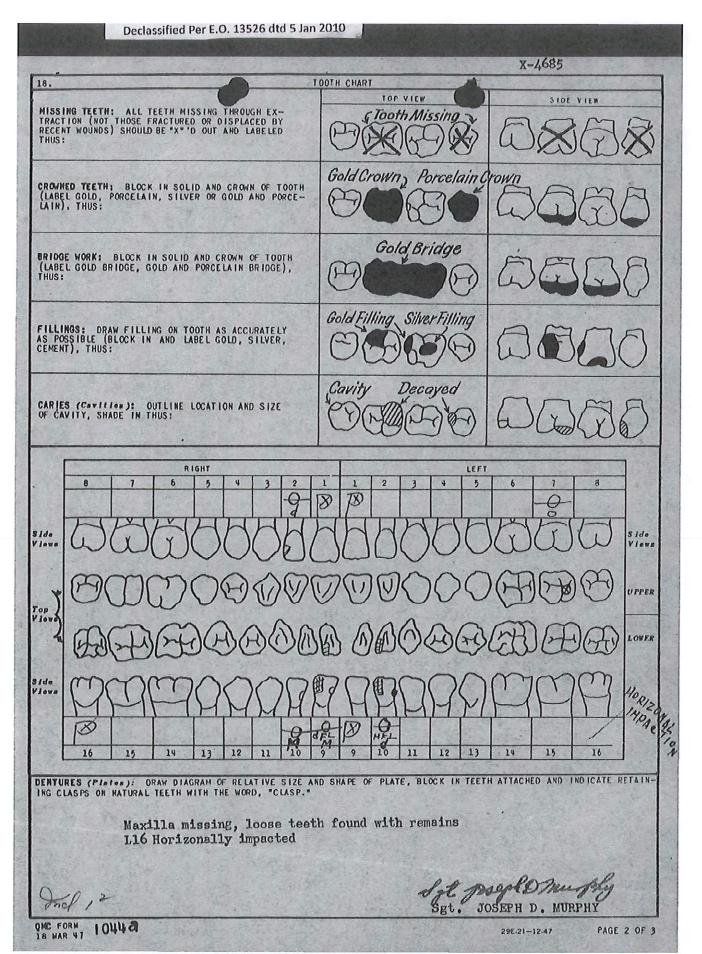

- 2018 Associate Editor of Forensic Anthropology (University of Florida Press)
- 2016 Diplomate of the American Board of Forensic Anthropology- (Elected to Board of Directors 2018)
- 2016 Member- Anthropology subcommittee for Organization of Scientific Area Committees (OSAC)
- Visiting Scientist Fellowship-Office of Chief Medical Examiner-NYC (OCME-NYC)This month long fellowship provided an opportunity for immersion into various aspects of day-to-day operations within a Medical Examiner's Office (medico-legal death investigation, autopsy, grand rounds, case management, academics, etc.), with a specific focus on the role of Forensic Anthropology. The OCME-NYC is the largest Medical Examiner's Office in the United States, responsible for cases in Manhattan, Brooklyn, Queens, the Bronx, and Staten Island.
- 2011 Qualified American Society of Crime Lab Directors Laboratory Accreditation Board -International Assessor.
- 2010 American Academy of Forensic Sciences (AAFS)Promoted to Fellow of the Physical Anthropology section (2017 Program Committee Chair, 2018 Section Secretary, 2019 Section Chair)

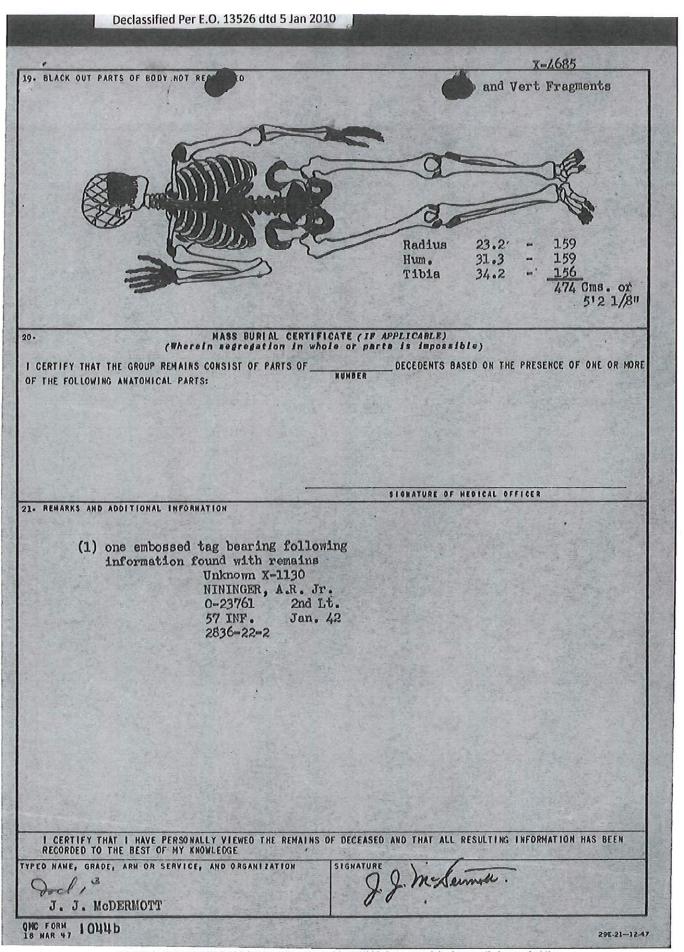

Emanovsky

2003 to Disaster Mortuary Operational Response Team (DMORT) Region VIII

On-call to offer assistance in the capacity of a forensic anthropologist/archaeologist in the event of a mass disaster or cemetery related incident. I was selected for this federal level response team designed to provide mortuary assistance under the local jurisdictional authorities such as coroner/medical examiners, law enforcement and emergency managers. Completed Disaster Medical Assistance Teams core training (e.g. Disaster Response, Incident Management System, Critical Incident stress Management, etc.) as well as DMORT core training (e.g. admitting, Tracking and Storage of Remains, Personal Effects in Transportation Incidents, Morgue Documentation etc.) through the U.S. Public Health Service online training programs. While I was on-call I never deployed on a DMORT mission.
